NOTATION //

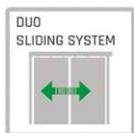

REBATED DOOR
THE WING HAS A REBATE (INDENTATION, FITTING NOTCH) WHICH OVERLAPS THE DOOR FRAME.

NON-REBATED DOORS
THE LEAF DOES NOT HAVE A FEEL DOOR LEAF WITH A FRAME CREATES A UNIFORM SURFACE.

SLIDING SYSTEM
POSSIBILITY OF APPLICATION IN A SLIDING SYSTEM.

DUO SLIDING SYSTEM
POSSIBILITY OF APPLICATION IN A DUO SLIDING SYSTEM.

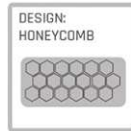

BLACK GLASS VSG
GLOSSY BLACK GLASS ON BOTH SIDES INSTEAD OF MILK GLASS.

DESIGN: MDF
FRAME DOORS MADE OF HIGH QUALITY MDF BOARD.

SLIM VERSION
MODIFICATION OF THE MDF CONSTRUCTION TO REDUCE THE LOAD ON THE HINGES.

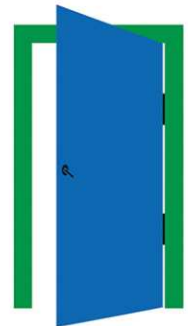

DESIGN: HONEYCOMB
PLATE FRAME, FILLED BY LAYER WITH "HONEYCOMB" STRUCTURE.

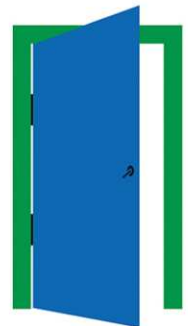

DESIGN: SOLID
DOUBLE PLATE FRAME, FILLED WITH SOFTENING BOARD SOLID CONSTRUCTION.

BLACK HDF
INSTEAD OF MILK GLASS FILLED WITH BLACK HDF PLATE.

POLYPROPYLENE VENEER//

NEW! KASHMIR

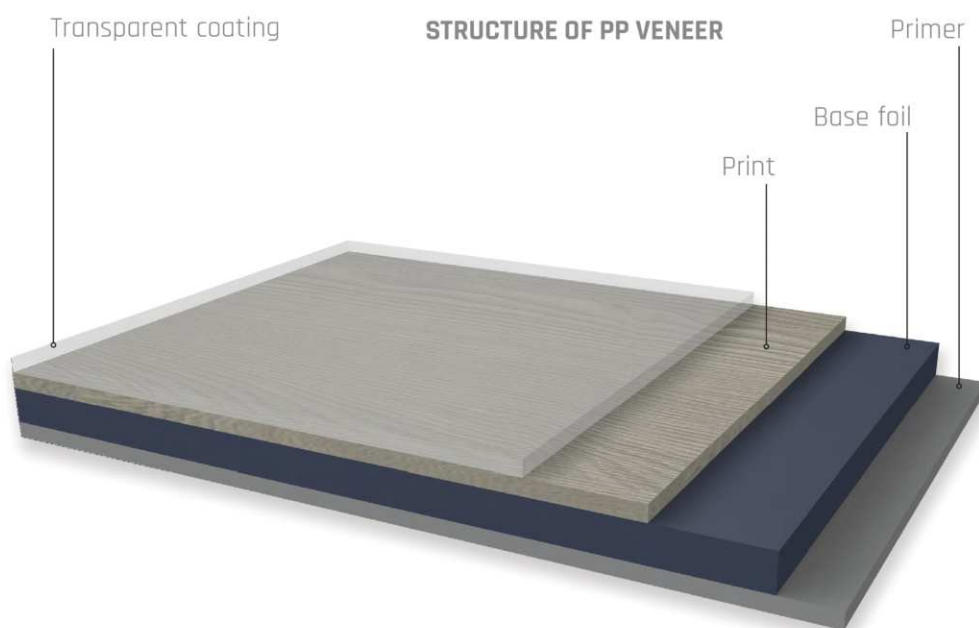

GRANDSON OAK

RIBEIRA

A decorative polypropylene (PP) based film is an eco-friendly product. Its surface is protected by a transparent heat-cured coating to protect it from abrasion, scratching and chemical influences.

CHARACTERISTICS OF PP VENEER

- atch resistant
- abrasion resistant
- chemical resistant
- water resistant
- vapour resistant
- mould resistant
- light resistant
- easy to clean
- formaldehyde and heavy metal free

ECO-FRIENDLY PRODUCT

The PP veneers used by WINDOOR offer eco-friendly features:

- formaldehyde-free
- halogen-free
- plasticiser-free

The product also has other positive environmental properties:

- made of harmless pigments
- low-emission waste disposal using incineration

The composition and production of PP veneers fully comply with the REACH regulation.

DOOR CONSTRUCTION//

WINDOOR doors are manufactured in three basic types of construction: MDF frame, honeycomb and SOLID. Due to a wide range of solutions used, the product can be freely adjusted to meet specific customer needs.

**CONSTRUCTION
MDF**

Prestige and SLIM series interior doors made of solid MDF.

**CONSTRUCTION
SOLID**

Interior doors with double frame and SOLID acoustic panel.

**CONSTRUCTION
HONEYCOMB**

Internal panel door with a frame filled with a layer of so-called honeycomb structure.

FRAME DOOR CONSTRUCTION//

NON-REBATED DOORS//

REBATED DOORS

NON-REBATED DOORS

A non-rebated door together with a dedicated frame creates a single plane, merging visually into the wall. That is what distinguishes a non-rebated door from a standard rebated door.

The rebated system is equipped with so-called screwed-in hinges, which are visible both when the door is closed and when it is opened. Assuming that the door is opened "towards your direction".

Doors in the non-rebated system are installed in the door frame on dedicated concealed hinges, which are not visible both when the door is closed and when it is opened.

Non-rebated doors have no notch (groove) overlapping the frame casing when the door is closed.

NO REBATE VISIBLE

CONCEALED HINGE

MODELS OF NON-REBATED DOORS

- FRAME DOORS
- LACQUERED DOORS
- SLIM SERIES
- CANIS

VSG BLACK GLASS//

VSG black glass is a laminated glass, produced by permanent bonding of two panes of glass with a bonding film.

Between the two panes of glass, the black bonding film is used to hold any fragments when the glass is broken, creating a "spider web".

DOORS AVAILABLE WITH BLACK VSG GLASS

- | | |
|-----------|-----------|
| ■ CHICAGO | ■ MINORIS |
| ■ CORVUS | ■ PEGASUS |
| ■ LIMES | ■ PRIM |

The VSG glass used by WINDOOR can withstand high stresses and loads.

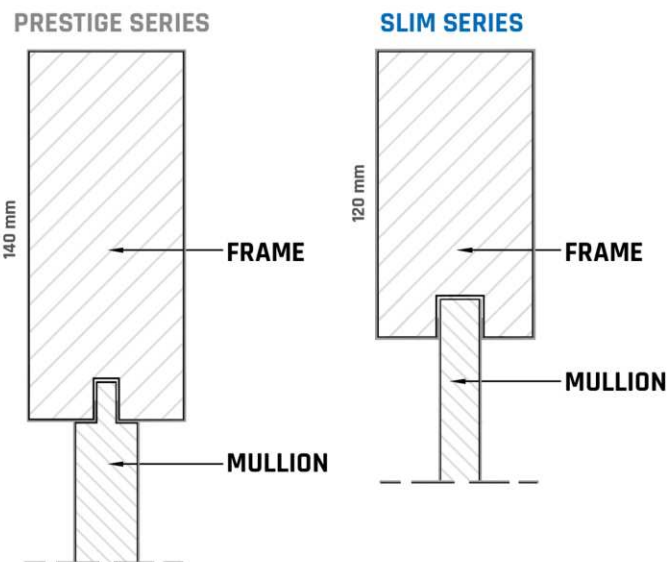

This product has many beneficial properties:

- greater safety (eliminates the risk of injury if broken)
- durability of construction
- higher resistance to breaking (glass does not break into small pieces)

SLIM SERIES//

The SLIM series is a new collection of WINDOOR interior doors that is characterised by a slimmer design due to the narrower width of the vertical frames but distinguished by a different construction method.

The SLIM series doors have many positive properties:

- slimmer design
- less weight
- less load on the hinges

ELEGANCE

CHICAGO

LOFT ELEGANCE//

LOFT ELEGANCE

Loft doors are a stylish and modern solution that adds character to any interior, perfectly matching the raw, industrial atmosphere of loft spaces.

The main feature of loft doors is a large glass surface, allowing light to flow in and optically enlarging the room. The LOFT ELEGANCE model is available in two glazing options; transparent or satin.

We recommend the loft sliding system visible in the photo when purchasing a sliding door leaf.

ADJUSTABLE REBATED DOOR FRAME//

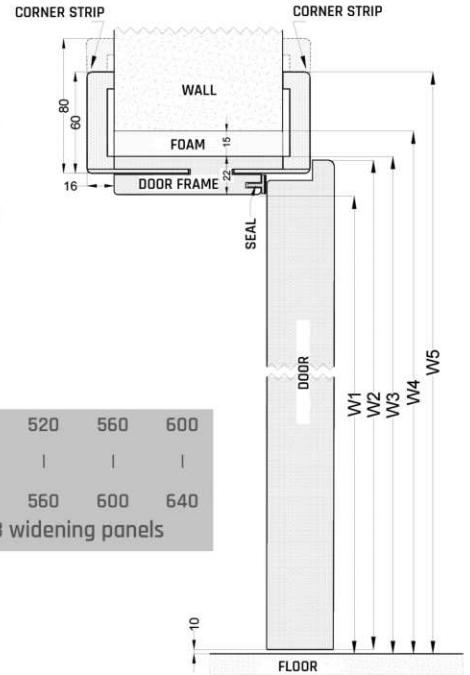

Designed for rebated internal doors, the adjustable frame consists of two main vertical beams (base) and one horizontal beam (head).

The frame set includes three screwed-in hinges and a rubber gasket.

The front part on both sides consists of 6 cm or 8 cm wide flat masking casings.

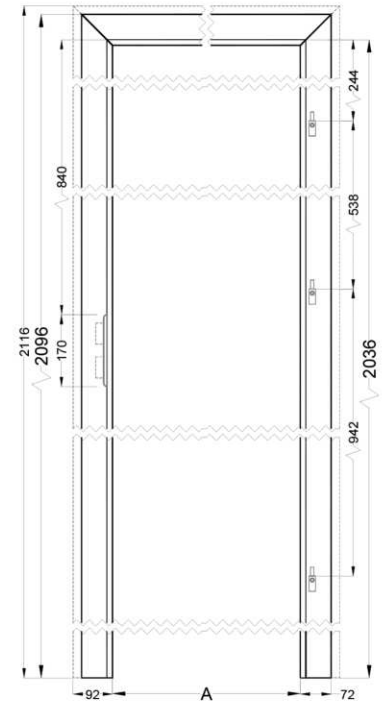

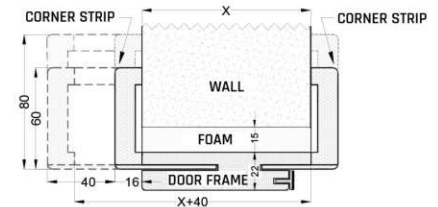

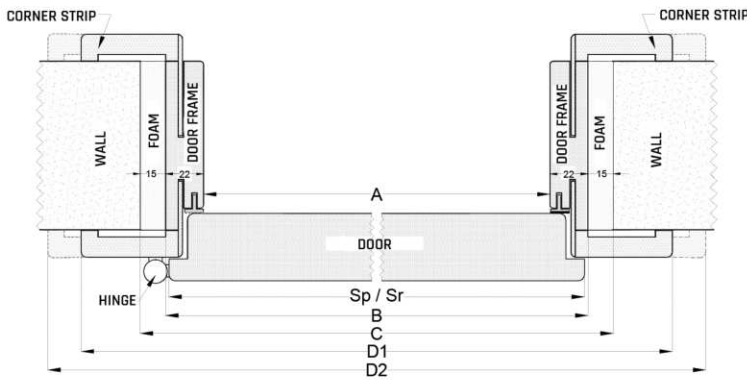

Due to a wide range of regulation, the adjustable frame can be fitted in walls up to 64 cm thick.

SLIDING SYSTEM//

WALL SLIDING SYSTEM

With the sliding system, a door leaf can be installed in rooms where a traditional door cannot or is not desired. The door leaf moves on aluminium guides above the door opening.

The aluminium guide (Fig. 1) is the main component of the sliding system. The set includes the rollers and the necessary mounting accessories. If you want to conceal the guide, we recommend the purchase of a cover.

The cover panel for the sliding system (fig. 2) serves as a curtain rod, covering the guide that is the main element of the sliding system. The set also includes a spacer bar and a bumper bar in the same veneer.

fig. 1

fig. 2

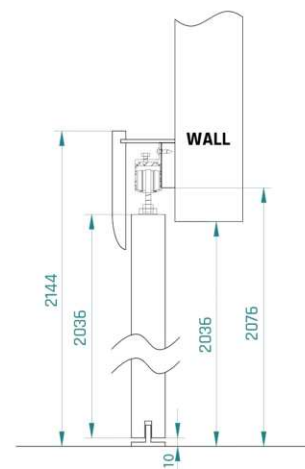

WALL SLIDING SYSTEM DUO

With the DUO sliding system, it is possible to install two sliding leaves within one system, thus enabling the door to be fitted in a much wider opening in the wall.

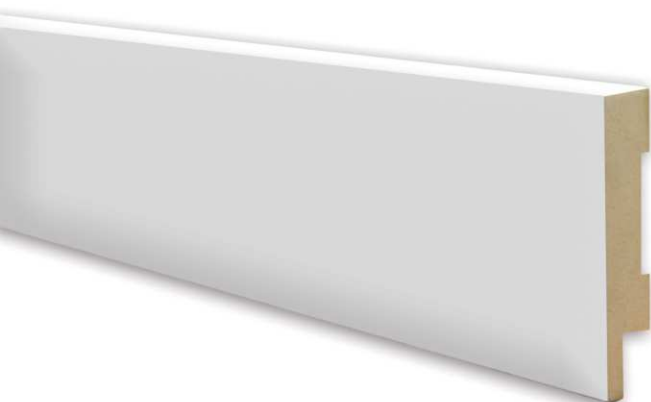

The standard version of the aluminium guide, which like in the single system is the main element of the DUO sliding system, is equipped with an additional symmetric DUO mechanism, thus providing the effect of simultaneous sliding of both leaves.

HOOK LOCK
ADDITIONAL FEE

BASEBOARD//

BASEBOARD

A skirting board is a finishing element used when installing floors, with an aesthetic and practical function.

Made of MDF, the board is highly durable and easy to process, which allows it to be adapted to various shapes and dimensions of rooms.

These boards perfectly mask the gaps between the floor and the wall, while protecting the edges of the floors from mechanical damage.

The variety of available veneers allows them to be matched to any interior design, emphasizing the elegance and finish of the room.

AVAILABLE BASEBOARD:

- 2050 X 80 X 14 mm
- 2050 X 100 X 14 mm

LAMDECO TRE//

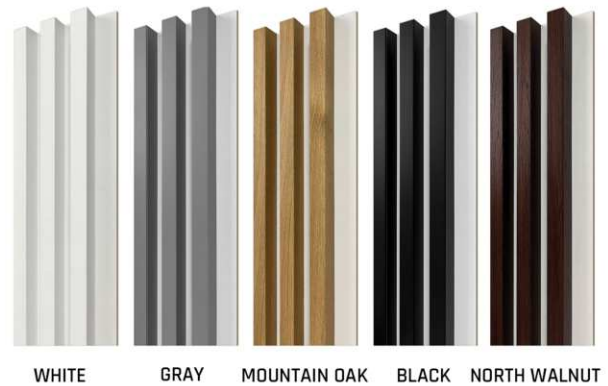

LAMDECO decoration panels are an elegant and versatile finishing solution for interiors. They are lightweight, durable and easy to install. The variety of colors allows you to match them to any interior style.

LAMDECO TRE SYSTEM ELEMENTS:

- triple internal panel / 37 x 178 x 2750 mm
- single starting panel / 37 x 66 x 2750 mm
- single ending panel / 37 x 28 x 2750 mm

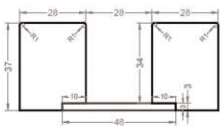

LAMDECO TRE BIANCO
